b. **Law.** The visible possibility of exercising over a thing such control as attaches to lawful ownership (but which may also exist apart from lawful ownership), the detention or enjoyment of a thing by a person himself or by another in his name; the relation of a person to a thing over which he may at his pleasure exercise such control as the character of the thing admits, to the exclusion of other persons; *esp.* the having of such exclusive control over land, in early instances sometimes used in the technical sense of *SEISIN*.

In the Roman Law, 'possession is usually said to consist of two elements—physical control and intention to possess, but in English law the latter element does not assume the same prominence as, in the shape of the *animus domini*, it has been thought to assume in Roman law. The general rule of English law is that exclusive physical control gives legal possession, unless the apparent possessor holds only as servant or bailee on behalf of another' (J. M. LIGHTWOOD in *Encycl. Law & Eng.* (1898) X. 229). Primarily, the term denotes a state of fact, but this fact carries with it legal advantages, and so is the source of rights. If the state of fact could always be ascertained with certainty, and if it always produced the normal legal effects, the subject of possession would present little difficulty, but it is frequently uncertain to whom the actual control of a thing is to be attributed, and when this question is settled, the law may credit the advantages of possession to some person other than the apparent possessor. Hence arises the distinction between *actual* and *legal* possession. Actual possession denotes the state of fact; but the person to whom are credited the advantages of possession has the legal possession, whether he is the actual possessor or no. Legal possession, when not accompanied by possession in fact, is known as 'possession in law'. (*Ibid.* 228-9.) See this article, also (*inter alia*), *Essay on Possession in the Common Law* by F. POLLOCK and R. S. WRIGHT, 1888, *Treatise on Possession of Land* by John M. LIGHTWOOD, 1894.

Termes Law* 158 Possession is said two wayes, eyther actual possession, or possession in law. Actual possession is when a man entred in deed into landes or tenements to him descended or otherwise. Possession in lawe, is when landes or tenements are descended to a man, and he hath not as yet really, actually, and in deed entred into them. 1706 PHILLIPS, *Unity of Possession*, is when the Possession, or Profit is united with the Property. Thus, if the Lord purchase the Tenancy held by Heriot-Service, then the Heriot is extinct by Unity of Possession, i. e. because the Signory or Lordship and the Tenancy are now in one Man's Possession. 1766 BLACKSTONE *Comm.* II. xxv. 389 First then of property in possession absolute; which is where a man hath, solely and exclusively, the right, and also the occupation, of any moveable chattels. 1818 CRUISE *Digest* (ed. 2) III. 330 The first degree of title is the bare possession, or actual occupation of the estate, without any apparent right, or any pretence of right, to hold and continue such possession. 1837 BARON FARRER in *Meeson & Welsby Rep.* II. 331 Ownership may be proved by proof of possession, and that can be shown only by acts of enjoyment of the land itself. 1861 J. Law* 1 As the name of Possession is one of the most important in our books, so it is one of the most ambiguous. Its legal senses (for they are many) overlap the popular sense. *Ibid.* 26 The following elements are quite distinct in conception: 1. physical control, detention, or de facto possession. 2. legal possession, the state of being a possessor in the eye of the law. 3. Right to possess or to have legal possession. *Ibid.* 27 Right to possess, when separated from possession, is often called 'constructive possession'. *Ibid.* 58 A servant in charge of his master's property, or a person having the use of anything by the mere licence of the owner, generally has not possession. 1894 J. M. LIGHTWOOD *Possession of Land* 2 Possession which is recognized by the law, is known as civil possession. The actual possession may be held by another on behalf of the civil possessor—by his servant or tenant, for example—and here the civil possession is still based on actual possession. 1898 — in *Encycl. Law & Eng.* X. 232 A person holding land as a tenant for years is denied the special form of legal possession known as *seisin*.

The English law, however, differing herefrom from the Roman law, does not refuse legal possession to bailees *Ibid.* 235 In the case of goods the mere right to possession is sometimes described as 'constructive possession', and is allowed the advantages of actual possession

c. **Phr.** In possession said (a) of a thing, actually possessed or held, often with possessive, *in* (one's) possession; (b) of a person, usually in possession of, actually possessing, holding, or occupying something. *Chose in possession*: see CHOSE. *Man in possession*, a duly authorized person who is placed in charge of chattels (furniture or the like) upon which there is a warrant for distress. I. † 1. From the beginning of the 16th c., applied to men with horses stationed or appointed in places at suitable distances along the post-roads (see POST-STAGE), the duty of each being to ride with, or forward with all speed to the next stage, the king's 'packet', and at length the letters of other persons, as well as to furnish change of horses to 'thorough-posts' or express messengers riding post. To lay posts, to establish a chain of such 'posts' along a route for the speedy forwarding of dispatches.

Posts were at first 'laid' temporarily only, when occasion demanded direct communication with a distant point, they were at length established permanently along certain routes. These 'posts' began in the 17th c. to be called 'postmasters' (q. v.), and were the precursors of the present local postmasters, or persons in charge of the local post offices, who receive and dispatch the local mails. In the 16th and 17th c. these 'posts' had also usually the exclusive privilege of furnishing post-horses to ordinary travellers, and of conducting the business of a posting establishment, which has since been separated from that of the Post Office.

[Note. The 'posts' in sense 1 correspond to the *equites dispositi* or 'posted horsemen' of classical and later times (cf. Caesar *B. C.* III. c.). The earliest known use of *postae*, *postes*, pointing to the modern sense is by Marco Polo, 1298, who applies, in the French text, ch. xcvi (ed. 1865, 335), *postes*, and, in the Italian, ch. lxxxv (ed. 1827, I. 91), *postas*, to the stations 25 miles apart on the great roads, at which the messengers of the Great Khan or Emperor of China changed horses, and at each of which from 300 to 400 horses are said to have been kept for their service. The expression 'nous disons postes de chevaux', i. e. 'we say post (or station) of horses', identifies the word originally with *It. postas* in the sense of *Post. sb.* The early course of the word in Europe is not altogether clear, but Milanese Latin documents of 1425-8 (L. OSIO *Doc. Dipl. Milanens.* 1872, II. 163, 357) have *portentur de nocte nuncque celeriter per cavallarios postarum*, 'let them be carried day and night swiftly by a post rider (horseman of the posts)', and *nutrit eas per cavallarios postarum*, 'let him send them by the horsemen of the posts'. In the second half of the 15th c. *F. poste* is found also as the appellation of the courier, and in this sense had become masculine before 1480. In English, also, the application of *postae*, *post*, to the courier is seen to go back practically to the earliest use of the word.]

b. Post captain. A captain who 'takes post': a designation formerly applied, officially and otherwise, to a naval officer holding a commission as captain, to distinguish him from an officer of inferior rank, to whom the courtesy title of captain was often given, either as being an acting captain, or as being master and commander of a vessel not rated to be commanded by a full-grade captain, and so not said to 'give post'. *Obs.* exc. *Hist.*

So far as the Naval Regulations are concerned the appellation appears to date from about 1791-47, and to have ceased in 1824, when the rule was laid down that only officers appointed to command ships of 20 guns or more

wards shall henceforth be styled Captains'. But, in unofficial language, the courtesy use of 'Captain' for the 'Master and Commander' of a smaller vessel, and the distinctive appellation 'Post-Captain', lingered to a much later period.

Postage stamp. [f. POSTAGE + STAMP sh.] An official stamp, either a stamp embossed on an envelope or impressed on a card or wrapper, or else (now usually) a small adhesive label having a specified face-value (in Great Britain from ½d upward), and bearing a design of a certain pattern and colour appropriated to its value, sold by or on behalf of the Post Office, to be affixed to any letter or packet sent by post, as a means of prepayment of postage, and as evidence of such payment.

The design is generally the head of the Sovereign or Ruler (whence in Great Britain the early popular appellation "Queen's head"), or the national arms or emblems, but many countries use various symbolic or fanciful pictorial devices, historical portraits, etc.

The name stamp was originally applied to the marks stamped or impressed by the Post Office on letters for various purposes, among others that of stating whether they were 'prepaid', 'unpaid', 'free', partly paid, or paid by the twopenny or other post. When adhesive labels and impressed envelopes were introduced in 1840, these took the

place of the 'paid' or 'prepaid' stamp, and appear to have been popularly called 'postage stamps' from the first. The official and more accurate name was *postage label*; but the popular usage prevailed; by 1850 *postage label stamp* was in official use, and finally *postage stamp* was accepted. The actual stamps (Ger. *briefstempel*) which continued to be impressed by the Post Office after 1840, to show the place and date of postage and arrival, and to obliterate or deface the postage-label, are now usually distinguished as *postmarks* and *obliteration-stamps* or *marks*.

Postmaster 2 (pō'stmāstər). The name given at Merton College, Oxford, from the 16th c., to the class of poor scholars instituted in 1380 by John Wyllyot; now the equivalent in that college of the term 'scholar' in general collegiate use.

For the first hundred years these appear in the College Register only as *pueri* (*M. Johannis*) *Wyllyot*, 'Wyllyot's boys'. But their essential characteristic was the reception of a limited weekly 'portion', *ebdomadales portionis*, hence we find them (from 1483) styled *portionista* or (1546) *portionista*, a term Englished in the 17th c., as by Wood, as *portionists*. The age of the term *postmaster* is not certain: it occurs in the College Records in 1593 in the established name of *Postmasters' Hall*, the dwelling opposite to the college in which the *pueri* or *portionista* had resided till c. 1575, when they were moved into the college. It also appears as the appellation of the *portionista* in English letters of 1610 preserved in the Records. But these casual occurrences show only that it was then a long-established name. As to its origin nothing is known; it has been variously conjectured to be a corruption of *portionista*, or a rendering of **post-magister* or **post-munister*, in allusion to the fact that the *portionista* were at one time servants to the Masters or Fellows, perhaps standing behind their chairs at dinner, etc. But *post-munister* does not occur in the college register, and the occurrence of *post-magister* is doubtful.

Potash (pō'tāsh), *sb.* [*Early mod E. pot-ashes pl., app. ad. Pg., mod.L. potassa*, *Sp. potasa*]

The sense-history of *potash* and its derivatives is involved in the advance of chemical knowledge. The earliest term was *pot ashes* or *pot-ashes* = *Du. pot asschen*, applied to the crude products. The essential substance of these, when purified from extraneous matters, was spoken of in the singular as *pot-ash* or *potash*. In 1756 this was proved by Dr. Joseph Black of Edinburgh to be a compound substance, a carbonate, the removal from which of the carbonic acid left a 'caustic alkali' or 'lye' (really the hydroxide, or caustic potash, KHO), which chemists thereafter generally considered to be the true *potash* (in *Fr. potasse*). In 1807 this, in its turn, was shown by Sir H. Davy to be not a simple substance, but to contain a new metal, of which he believed it to be the oxide. To the metal (K) he gave the name *potassium*, to the oxide (on the analogy of *magnesium* and *magnesia*, *sodium* and *soda*, etc.) that of *potassa*. Next year, Dakeel gave reasons for believing that the latter contained also water, and it was subsequently shown to be the hydroxide or hydrate (KHO), the simple oxide being the anhydrous form (K₂O). The salts of potassium, in accordance with the chemical theory of the time, were viewed as compounds of the oxide, and variously named carbonate of *potassa*, of *potass*, of *potash* (= potassium carbonate, K₂CO₃), chlorate of *potassa*, *potassi*, or *potash* (= potassium chlorate, KClO₃), etc. Commercially 'potash' is still often applied to the carbonate, by chemists usually to the hydroxide or hydrate, caustic potash, KHO, but sometimes to the anhydrous oxide, K₂O, and in names of compounds it is still often used instead of 'potassium', as *chlorate of potash* = *potassium* or *potassic chlorate*

1. An alkaline substance obtained originally by lixiviating or leaching the ashes of terrestrial vegetables and evaporating the solution in large iron pans or pots (whence the name). Chemically, this is a crude form of potassium carbonate (more or less mixed with sulphate, chloride, and empyreumatic substances), but was long thought to be (when freed from impurities) a simple substance.

T. THOMSON *Loud Disp* (1818) 320 Impure Potash. Impure Sub Carbonate of Potash. Potashes, Pearl-ashes. This substance consists chiefly of subcarbonate of potash, mixed with some other salts. 1850 DAUBENY *Atom. The.* xii. (ed. 2) 416. In a few instances, as in potass-albite, this base would seem to be partly soda and partly potash.

¶ **Potassa** (pote'ssā). *Chem.* [*mod. L.*: see POTASS.] The name appropriated by Davy to potassium monoxide, K_2O , also called *anhydrous potash*; sometimes also applied to the hydrate or hydroxide, KHO ($=K_2H_2O_2$), also called *potassa fusa* and *caustic potash*.

Formerly used in names of chemical compounds in which current nomenclature uses potassium, as *carbonate of potassa* = *potassium carbonate*, K_2CO_3 (regarded as $K_2O \cdot CO_2$).

Liquor potassæ, an aqueous solution of potassium hydrate, containing about 5.84 per cent of the hydrate.

1812 SIR H. DAVY *Chem. Philos.* 334. This substance is pure potash or potassa, which was unknown in its uncombined state till I discovered potassium, but which has long been familiar to chemists combined with water in the substance which has been called pure potash; but which ought to be called the hydrate of potassa. 1813 — *Agric. POTASS or POTASH* (see Note there), in accordance with the names of metals in -ium.] One of the elements, an alkaline monad metal, the basis of POTASS; it is a highly lustrous white metal with a slight tinge of pink, soft at ordinary temperatures, of specific gravity 0.865, being the lightest solid body known except lithium; when exposed to the air it at once tarnishes or oxidizes, and when thrown upon water instantly decomposes it, uniting with the oxygen and causing the liberated hydrogen to burn with a characteristic violet flame. Symbol K (for *Kalium*), atomic weight 39.1.

[*ad. Sp. patata*, a variant of BATATA, orig. the native name in Haitian in sense 1. So, in same sense, *F. patate*, obs. It. *potata*, Ger. *potate*.] Sense 1 is the original; the plant to which it is applied was to Geiarde, in 1597, 'the common Potatoes'; the plant in sense 2, on account of its general likeness to the other as producing esculent tubers, he called from its alleged source 'Virginia Potatoes'; and (in his *Catalogue* of 1599) 'Bastard Potatoes'; but when this came to be an important object of cultivation as a food plant, it became 'the potato' par excellence, the exotic plant and tuber originally so named being distinguished by some adjunct. In 17th c. instances of the word it is often difficult or impossible to determine which plant is meant.

1. A plant, *Batatas edulis*, N. O. *Convolvulaceæ*, having tuberous roots, for which it is cultivated for food in most tropical and subtropical regions of the world; = BATATA. Its native region is unknown, but it appears to have been seen by the Spaniards first in the West Indies c. 1500. Now distinguished as *Sweet* or *Spanish potato* (see 3 a).

a. The tuber.

2 The plant *Solanum tuberosum*, a native of the Pacific slopes of South America, introduced into Europe late in the 16th century, and now widely cultivated for its farinaceous tubers: see b.

Described in 1553, under the name *papas*, in the *Cronica de Peru* of Pedro Cieza, cap. xl, § 5. Introduced into Spain, it is said, from Quito, soon after 1580, and thence, c. 1585, into Italy, in 1587 grown at Mons in Hainault, whence in 1588 two tubers were obtained and grown by the botanist Clusius, Keeper of the Botanical Garden to Maximilian II; described by him as *Papas Peruanum*. Soon grown in other botanic gardens, as at Breslau in 1590. The plant may have been brought independently to England, where Gerard had it growing in 1596, but he was in error in his statement that he obtained it from Virginia (whence the erroneous name *Virginia Potatoes*, long kept up by English writers); for the plant is not a native of Virginia, and was not cultivated there in 16th c. In 1693 its introduction into Ireland was attributed to Sir Walter Raleigh 'after his return from Virginia' (where he never was); but no contemporary statement associating Raleigh's name with the potato has been found. See Bushfield *Raleighiana* II. in *Trans. Devonsh. Assoc.* 1898, XXX, 158-159, B. Daydon Jackson in *Gardeners' Chron.*, 1900, XXVII, 161, 178.

1597 GERARDE *Herbal* II cccxxv 781 Of Potatoes of Virginia. Virginia Potatoes hath many hollowe flexible branches, trailing vpon the grounde, three square, vneuen, knotted or kneed in sundry places. The roote is thicke, fat, and tuberous; not much differing either in shape, colour or taste from the common Potatoes, sauing that the rootes hereof are some of them round as a ball, some oval or egge fashion, which knobbie rootes are fastened vnto the stalkes with an infinite number of the thicke strings. *Ibid.* 782 Because it hath not onely the shape and proportion of Potatoes, but also the pleasant taste and vertues of the same, we may call it in English Potatoes of America, or Virginia.  tion, supposition, etc. 1837 G. PHILLIPS *Syrac. Gram.* 117,

5 *Physics.* a. *Potential function*: a mathe-
 matical function or quantity by the differentiation
 of which the force at any point in space arising
 from any system of bodies, etc. can be expressed.
 In the case in which the system consists of separate
 masses, electrical charges, etc., this quantity is
 equal to the sum of these, each divided by its
 distance from the point.

Introduced in 1828, by G. Green, with special reference to
 electricity. Now usually called simply *potential* (see B 4).

1828 G. GREEN *Appl. Math. Anal. to Electr. & Magn.* in
Math. Papers (1871) 9 Nearly all the attractive and re-
 pulsive forces in nature are such, that if we consider any
 material point *p*, the effect, in a given direction, of all the
 forces acting upon that point, arising from any system of
 bodies *S* under consideration, will be expressed by a partial
 differential of a certain function of the co ordinates which
 serve to define the point's position in space. The considera-
 tion of this function is of great importance in many in-
 quires. We shall often have occasion to speak of this
 function, and will therefore, for abridgement, call it the
 potential function arising from the system *S*. 1882 MINCHIN
Unipl. Kinemat. 135 The function ϕ is called the potential-
 function of the strain, and the curves obtained by varying
 the constant in the equation $\phi = C$ are called curves of equal
 potential.

b. *Potential energy* energy existing in a posi-
 tional form, not as motion see ENERGY 6.

Introduced by Rankine in 1853, *potential* being opposed
 to *actual*, as in sense 2, Thomson and Tait substituted
kinetic for *actual*, making *potential energy* the opposite of
kinetic energy. The Latin expression *vis potentialis* had
 been used by the two Bernoullis and Euler a 1750.

1853 W. RANKINE *Transform. Energy* in *Sci. Papers* (1881)
 203 By the occurrence of such changes, actual energy dis-
 appears, and is replaced by Potential or Latent Energy;
 which is measured by the product of a change of state into
 the resistance against which that change is made (The
 vis viva of matter in motion, thermometric heat, radiant
 heat, light, chemical action, and electric currents, are forms

of actual energy, amongst those of potential energy are those of the mechanical powers of gravitation, elasticity, chemical affinity, statical electricity, and magnetism. **1866** ODLING *Ann. Chem.* 71 We may thus render muscular force latent in a stretched bowstring, raised cannon-ball, or other instrument, for any length of time. This latent force is generally spoken of as potential energy, while the active force exercisable at any moment by the flying arrow or falling ball constitutes its actual or dynamic energy. **1868** THOMSON & TAIT *Elem. B. sb. + l. A potential agent, a thing that gives power. *Obs. rare.*

1866 BLOUNT *Glossary*, Potentials, things apt to breed or give power, strength or ability.

2. That which is possible, opposed to what is actual; a possibility.

Lit.* I. xii 245 The potential works in them, even as the actual works on them! **1883** EDWARDS *Life Jesus* (ed. 6) I. 634 With this belief our highest thoughts of the potential for humanity are connected. **1889** J. 4. Physics. Short for potential function: see A. 5 a. Hence, the amount of energy or quantity of work denoted by this, considered as a quality or condition of the matter, electricity, etc., in question. See QUOTA.

(*Potential* as the name of a function was undoubtedly introduced by Gauss in 1840' (G. F. Becker in *Amer. Phil. Sci.* 1893, Feb. 97). (Cf. GAUSS *Algeme. Lehrkräfte d. Quadrats d. Potwaller (*pp* to; *wq* lax). [*f.* POT *sb* 1 + *waller*, agent-n from WALL *v*, OE. *weallan* to boil.]

lit. = *Pot-boiler*, the boiler of a pot: the term applied in some English boroughs, before the Reform Act of 1832, to a man qualified for a parliamentary vote as a householder (i.e. tenant of a house or distinct part of one) as distinguished from one who was merely a member or inmate of a householder's family; the test of which was his having a separate fire-place, on which his own pot was boiled or food cooked for himself and his family

According to 18th c statements, the test was at times abused by persons not householders, who in anticipation of an election and of receiving money for their vote, boiled a pot in the presence of witnesses on an improvised fireplace in the open air within the borough, and thus passed as pot-wallers

Pounce (pouns), v.¹ Forms: (5) pounce (?), pownce, 5-6 pownse, 5-7 pounce, pownce, 5- pounce (9 dial. punse, punce). [Goes in form and sense with **POUNCE** sb.¹ Senses 1, 4, 5, 6, are found also in **PUNCH** v (sense 4 in Wyclif), sense 2 is found in **pounceon**, **POUNSON** v. Two examples in one place in Chaucer, where the MSS are divided between **pounson** and **pounce**, a. F. **poinçonner**, OF. **pouchonner**, = It. **punsanare**

On account of the rarity of **pounson** in Eng, **pounce** and **punch** can hardly have been shortened from it, but they may have been thus formed from the Fr. vb., or in some senses from **POUNCE** sb.¹

Of the Romanic langs., Spanish and Portuguese alone have a corresp. vb, Sp. **punsar** 'to punch, prick, sting', Pg. and OSp. **puncar** 'to prick, to pounce, to fume' (Minshew 1599); but the derivation of a 14th c. word from these langs. seems out of the question Cf. **POUNSON** v., **PUNCH** v.]

Pound (paund), sb. 1 Forms: 1-4 (*Sc.* and *n. dial.* -9) pund, (4-5 *n. dial.* punde), 3-pound, (4-6 pounce, pounce(e), pond(e)). [OE. *pund* (pl. *pund*) :-WGer. stem **pundo-* pound (weight), = OSax., OFris., ON., Goth. *pund* (MLG. *punt*, LG. *pund*, MDu. *pont*, Du. *pound*), OHG. *phunt* (MHG. *pfunt*, G. *pfund*), a very early adopted word, a. L. *pondo* indeed a pound (weight), orig. instr. abl. of **pondus*, -um = *pondus*, er-weight, in use short for *libra pondo* a pound by weight, a pound weight.]

I. 1. A measure of weight derived from the ancient Roman *libra* (= 327 25 grams), but very variously modified in the course of ages in different countries, and as used for different classes of things; in the British Empire now fixed for use in trade by a Parliamentary standard Denoted by lb (L. *libra*). Formerly used without change in the pl., a usage still sometimes retained after a numeral, *sc. dial.* and *collog.* also in comb., as a five pound note, a twenty pound shilling.

This pound consisted originally of 12 ounces, corresponding more or less to that of 1200 weight, q. v., which contains 5750 grains = 373 25 grams. This is still used by goldsmiths and jewellers in stating the weight of gold, silver, and precious stones; but as early as the thirteenth or fourteenth century a pound of sixteen ounces was in use for more bulky commodities. This was made a standard for

general purposes of trade by Edward III, and known as the pound *avordupois*, q.v. This pound of 16 ounces, containing 7000 grains = 453.6 grams, has been since 1826 the only legal pound for buying or selling any commodity in Great Britain. In former times the pound varied locally from 12 to 27 ounces, according to the commodity, pounds of different weight being often used in the same place for different articles, as bread, butter, cheese, meat, malt, hay, wool, etc. See a list in *Old Country and Farming Words* (E. D. S.) 174-5. The Scotch pound of 16 ounces of Troy or Dutch Weight consisted of 7608.9496 grains; the Tron pound kept at Edinburgh = 9622.67 grains. Pound is also used to translate foreign names of weights, of cognate origin or representatives of L. *libra*. These vary greatly in Italy between 300 and 350 grams, in Spain and Portugal, the Netherlands, and some German states between 450 and 460 grams, in other German states, Denmark, etc. between 477 and 510222 grams. But the standard German *Pfund* is now 500 grams, i.e. half a kilogram.

III. 8. Special uses with *adv.* or *prep.*

For general uses with *for th, out*, etc., see *prec. senses*

† a. Pour on (in *M.E.* with indirect passive). To overspread with something poured, to suffuse fully. [= *L. suffundere*] *Obs.*

c. 1450 *tr. De Institutione* i. xxiv. 33 þe lecherous men shal be poured on wip breynyng picche & styngyng brymston.

† b. Pour out: to scatter, spread about. In pa. pple. poured out = *L. effusus, diffusus*, spread out diffusely. *Obs. rare.*

c. 1586 CATRESS *Pembroke's P.* xlv. vi. As sheepe . . . we lie alone, Scatterling by Thee out poured. 1748 THOMPSON *Cast. Indol.* i. lxxi. Where, from gross mortal care and business free, They lay, poured out in ease and luxury. [Note: It has been suggested that *M.E. pour-en* was an irregular representative of *F. purer* — *L. purare* to purify (with religious rites). *F. purer*, now 'to scum', had in OF the senses 'to purify, clarify, cleanse, rinse'; also in Norman 'to drip' [Lajoie revient tant moullé, qu'il puruyt de toutes parts, c. 1560 in Godef.], so still in Guernsey [Jo l'cidre qui pure dans l'auge, 'I hear the cider dripping or pouring into the trough' (Moisy), and in mod. Norman and other dialects 'to drip, drop, ooze, or flow out', in Burgundy, etc., 'to press, wring, or squeeze juice or water out of anything' (Godef.). English shows no trace of an original sense 'purify', nor even of 'press or squeeze out', and the intranitive sense 6, which comes near that of 'drip or flow out', is not of early appearance; so that the historical connexion of sense is not evident. The phonology also presents difficulty, it is doubtful whether Eng. has any certain instance of *ou* (or even *o*, *oo*) from *Fr. u*. — *L. u*.]

Pour (pōr), *sb.* [f. *POUR* v.]

Præ, in med L. also *præ*, a L. prep. and *adv.*, meaning 'before'; a very frequent prefix and combining element. There are some 17th century words, that became obsolete before the *præ*- form became predominant, which are found only with the spelling *præ*-. This spelling has also been deliberately used by some writers in words commonly spelt with *Præ*- and so entered in this dictionary.

1905 C. S. PEIRCE in *Monist* April 166. **Pragmatism** (præ'gmätiz'm) [f. Gr. *πράγμα*, *pragmat-* a deed, act (see PRAGMATIO) + -ISM. Cf. Ger. *pragmatismus*]

1. Officiousness, pedantry; an instance of this. 1863 COWDEN CLARK *Shaks. Char.* viii. 211 Our laughing at his pragmatisms and solemn comcomby. 1895 E. J. HARDING in *Critic* (N. Y.) 9 Feb. 95 How refreshing it is, this absence of pragmatism, this genial resolve to take life as it is, for better for worse.

2. Matter-of-fact treatment of things; attention to facts. 1872 G. ELLIOT *Middlem.* lxxi, Mrs. Dollop had often to resist the shallow pragmatism of customers disposed to think that their reports from the outer world were of equal force with what had 'come up' in her mind.

†3. A method of treating history in which the phenomena are considered with special reference to their causes, antecedent conditions, and results, and to their practical lessons. Obs. 1832 SIR W. HAMILTON *Discours.* (1833) xix note, No word occurs more frequently in the historical and philosophical literature of Germany and Holland, than *pragmatisch*, or *pragmaticus*, and *Pragmatismus*, the word is peculiarly employed to denote that form of history, which, neglecting circumstantial details, is occupied in the scientific evolution of causes and effects. 1865 tr. *Strass's New Life Jesus* I. ii. xvi, I have drawn attention to the prophetic pragmatism of Matthew. 1884 D. HUNTER tr. *Reuss's Hist. Canon* xv 274 According to the pragmatism of history, we should now turn our attention to the influence which the reforming movement of the sixteenth century exercised on the notion of the biblical canon.

4. *Philos.* The doctrine that the whole 'meaning' of a conception expresses itself in practical consequences, either in the shape of conduct to be recommended, or of experiences to be expected, if the conception be true (W. James); or, the method of testing the value of any assertion that claims to be true, by its consequences, i.e. by its practical bearing upon human interests and purposes (F. C. S. Schiller). 1898 W. JAMES *Philos. Concept. & Pract. Results* 5 The principle of practicalism or pragmatism, as he [C. S. Peirce] called it, when I first heard him enunciate it at Cambridge [Mass.] in the early '70s, is the clue... by following which... we may keep our feet upon the proper trail. *Ibid.* 6 To attain perfect clearness in our thoughts of an object, then, we need only consider what effects of a conceivable practical kind the object may involve... Our conception of these effects, then, is for us the whole of our conception of the object, so far as that conception has positive significance at all. This is the principle of Peirce, the principle of pragmatism. 1900 W. CALDWELL in *Mind* Oct. 436 In this so-called Pragmatism or Practicalism of Prof. James. 1902 F. C. S. SCHILLER *ibid.* Apr. 203 To set forth fully the doctrine which he has named *Pragmatism*, and which I would fain advance against that of Aristotle. 1902 — *Personal Idealism* 63. 1903 *Hibbert Jnl.* Mar. 577 Pragmatism is a new analysis of 'truth' inspired by the recent progress of psychology. 1906 SCHILLER *Humanism* 8 Pragmatism is the doctrine that 'truths' are 'values', and that 'realities' are arrived at by processes of valuation. 1906 *Academy* 4 Aug. 206/2 The most recent and (philosophically speaking) fashionable 'ism' that the new century has produced—known, by some as Humanism, and by others as Pragmatism.

Pragmatist (præ'gmätist). [f. as prec. + -IST.] 1. A pragmatical person, a busybody. 1640 BR. JONES *ibid.* Apr. 567 It is quite true, as the Pragmatists or Personal Idealists aver, that our purposes define the meaning of things. 1907 *Ch. Times* 8 Feb. 178 The pragmatist takes religion as he finds

it, a working life; he studies the Christian life, and considers that the best way to study it is to live it, he is content to leave many things unexplained.

b. *attrib.* or as *adj.* Of or according to pragmatism. 1903 *Hibbert Jnl.* Mar. 578 The evidence for a pragmatist interpretation of the reason.

A little later the sb. *praise* began to be formed from the vb. in this restricted sense = Lat. *laus*; so that from the 15th c. we have *prize*, *prize* vb. beside *pris*, *prize* sb., and *praise* sb. beside *praise* vb.]

Skr. prākṛta* natural, unrefined, vulgar: opposed to *sanskṛta* prepared, refined, polished (Sanskrit).] A general name for those popular languages or dialects of Northern and Central India which existed alongside of or grew out of Sanskrit.

Applied primarily to the ancient vernacular dialects, the earliest traces of which go back to c 500 B.C.; then to the medieval Prakrits which succeeded these; and sometimes to the modern languages Hindi, Bengali, Marathi, etc. Pali is a form of primary Prakrit.

Pre- (prē, prī, prī) *prefix*, repr. L. *prae* adv. and prep. (of place, rank, and time) before, in front, in advance. This was commonly written *præ* or *præ* in med.L., and has become *pre-* in the modern Romance langs. In Eng. the prefix was sometimes written *præ-* after the revival of learning, but is now regularly *pre-*. In a few words recognized as Latin, and their immediate derivatives, *præ-* is now usual, though even these are frequently, esp. in America, written with *pre-*. See *PRÆ-*.

In L. *præ* was prefixed adverbially to a great number of verbs, as *præ-acutere* to sharpen in front, *præ-ambulare* to walk before, *præ-cludere* to shut in front, *præ-cognoscere* to foreknow, *præ-currere* to run before, *præ-eminere* to stick out before, be prominent, *præ-judicare* to judge or pass sentence beforehand, *præ-mordere* to bite off before the point or abruptly; also with verbal derivatives, as *præcursor* a leader in singing, *præcursor* a forerunner, *prædictio* foretelling, *præfatum* fore-speech, preface. Less often with adjs. and sbs., as *præcursus*, *præmatūrus* grey, ripe before (the time), *præsum* leading the way, *præsumptus* a servant standing before, *præmolestia* trouble beforehand, *prænomen* a forename or first name. Also very frequently prefixed as an intensive to adjectives, as *prævalens* high before or in comparison with others, pre-eminently high, *prævalens* pie eminently clear or bright, *præpotens* exceedingly powerful, prepotent, *prævalens* very strong. In Latin *præ-* was rarely prefixed with prepositional force, as in *præcordia* the parts in front of the heart, *præcipia* places in front of or near the bank of a river, *præmodum* adv. surpassing or beyond measure.

In English many Latin verbs and their derivatives in *præ-* have their representatives in *pre-*, and the use of this prefix has been greatly extended, so that it is now a living element, prefixable to almost any verb of Latin origin, and even sometimes prefixed to words of English or modern origin, as *pre-breathe*, *pre-embury*, *pre-plot*, *pre-sift*. Its use with adjectives or substantives, other than verbal, is less common, and the L. intensive use in *prævalens*, etc., though retained in a few words taken or imitated from L., is not a living use in Eng. But the prepositional construction, in which *præ* governs the second element, which was so rare in L., has in English received vast extension, so as to become the second great living use, *præ* being preferred to *ante* as the opposite of *post* in new formations, and often substituted for it, as in *præ-baptismal*, *præ-Christian*, *præhistoric*, *præ-Darwinian*, *præ-reformation* instead of *ante-baptismal*, *ante-Christian*, *ante-historic*, *ante-Darwinian*, *ante-reformation*. This preference of *præ* may be partly due to its superior shortness and neatness, but is prob. largely in order to avoid the oral confusion of *ante* with *anti*, as in *ante-Christian*, *antichristian*, *ante Darwinian*, *anti-Darwinian*.

Pronunciation. In all English formations in *præ*, and some of those formed in Latin or French, in which the sense of 'before' is felt, the prefix is pronounced with a clear *e*, long or short (i, 2). In nonce-combinations, the vowel is regularly long, and more or less stressed, e.g. *pre-bail* (prē bōi), *pre-Greek* (prē grē k), *pre-telegraph* (prē tēlgrāf). In words of this class of more permanent standing and more independent meaning, the *e* is long (f) when stressed, and usually short (i), but capable of being long (f), when not under stress primary or subordinate, e.g. *præ-ada nce* (prē-), *præ-damite* (prē- or prī-). In words from Latin in which the sense 'before' is obscured or lost, *præ*, when unstressed, is (prī-), when stressed, (prē-) or (prī-) thus, *præ-cunct* (prē-), *præ-act* (prī-), *præ-cipice* (prē-sipis), *præ-cipitous* (prē-sipit), *præ-fer* (prē-), *præ-ference* (prē f). But here also (prī-) is lengthened to (prē-) under rhetorical or factitious stress, as in 'Did you say "repair" or "prepare"?' 'not the "procession" but the "præcession" of the equinoxes'.

Use of Hyphen. Nonce-words and casual compounds of English formation in *præ* are usually hyphenated, as *præ-geological*, *præ-insist*, *præ-medicate*, compounds already formed in Latin or French, and their derivatives, are regularly written *indivisum*, as *præcaution*, *prædestination*, *præ-figure*. But between these extreme types there are very many combinations in which the use varies, the hyphen being employed whenever its use appears to add to the clearness of the writer's meaning, or when it is desired to emphasize the function of the prefix, to contrast the compound with the simple word or with the analogous compound in *post*, or the like. In this dictionary, such words are as a rule entered in the unhyphenated form, though the quotations will show that both forms are freely used. But in words in which *præ* is prefixed to a word or element beginning with *e*, the hyphen is conveniently used to separate the two *e*'s, as in *præ-eminent*, *præ-engage*, *præ-exist* (These are sometimes printed *præeminent*, etc.).

In this dictionary, all important and established words in *præ* are treated as Main words and will be found in their alphabetical places. But compounds of rare occurrence, chiefly obsolete, and those of obvious meaning and regular formation, are given below, under their respective classes. Nonce-words and casual combinations can be formed at will, and are unlimited in number, so that only examples showing their formation and use are required.

[Arrangement. A. *præ* adverbial. I Of time or order. 1, with vb.; 2, with sb.; 3, with adj. II Of place. 4, with adj. or sb. III. 5, Of order, rank, importance, quality, degree. IV. 6, Intensive. B. *præ* prepositional. I Of time. 1, with adj.; 2, with sb. or phr. II Of place. 3, with adj.]

Prebendary (pre'bendär), *sb* (a) [ad. med.L. *prebendarius*, f. *prebenda*. see PREBEND sb. and -ARY 1.]

1 The holder of a prebend, a canon of a cathedral or collegiate church who holds a prebend.

Originally, each canon had a *prebenda* or share in the funds of the church to which the clergy-house was attached, in later times when the custom grew up of assigning a particular estate for the support of a particular canon, the latter received also the designation of *prebendary* from the estate so assigned, e.g. 'Canon of St. Paul's and Prebendary of Finsbury'. By act 3 & 4 Vict. c. 113 of 1840, the members of a cathedral chapter (except the dean) are now called *canons*; but in some chapters of the Old Foundation the name *prebendary* (with a territorial addition) is retained for the titular holder of a divendowed prebend, whose status is, in most respects, similar to that of the *Honorary Canons* in cathedrals of the New Foundation.

3. *Astron.* **Precession of the equinoxes**, often ellipt. *præcession (æquinocliorum) præcessio* (Copernicus): called by Hipparchus and Ptolemy *περίπνοσις* mutation]. the earlier occurrence of the equinoxes in each successive sidereal year, due to the retrograde motion of the equinoctial points along the ecliptic, produced by the slow change of direction in space of the earth's axis, which moves so that the pole of the equator describes a circle (approximately see NUTATION) around the pole of the ecliptic once in about 25,800 years. Hence commonly used to denote this motion of the equinoctial points, of the earth's axis, or of the celestial pole or equator.

As a result of the precession, the longitudes, right ascensions, and declinations of all the stars are continually changing, and the signs of the zodiac shift in a retrograde direction along the zodiac, so that they no longer coincide with the constellations from which they were named (cf. the statement s.v. CANCER *sb.* 2 b).

Lunilar precession that part of the precession which is caused by the combined attractions of the moon and sun upon the mass of the earth (the remaining effect being due to the attractions of the other planets).

1. *Theol.*, etc. The action by which God is held to have immutably determined all (or some particular) events by an eternal decree or purpose.

'Predestination' is a theological term, sometimes used with greater latitude to denote the decree or purpose of God by which He has from eternity immutably determined whatever comes to pass, sometimes more strictly to denote the decree by which men are destined to everlasting happiness or misery; and sometimes with excessive strictness to denote only predestination to life or election' (Marcus Dods in *Encycl. Brit.* (1883) XIX. 668/2).

The action of God (insisted upon in some systems of doctrine, esp. those associated with the names of St. Augustine, St. Thomas Aquinas, and Calvin), in foreordaining the future lot and fate of all mankind in this life and after death (including their salvation or perdition); and, generally, His foreordaining of whatsoever comes to pass. B. sb. In general sense: That which may be predicated

1785 *REID Intell. Powers* v. 1 (1803) II. 110 A predicabile therefore signifies the same thing as an attribute 1837 *HALLAM Hist. Lit.* I. 1. iv § 79 322 This method appears to be only an artificial disposition of subjects and predicates, according to certain distinctions 1906 *JOSEPH Introd. Logic* iv. 54 A predicabile is merely that which can be predicated viz. that which is universal, not an individual, all kinds, qualities, states, relations, etc., are predicabile, and they are universal, because they may be exemplified in and belong to more than one individual subject

b. spec. In Aristotelian Logic (in *pl.*, *tr.* *Gi.* *κατηγορία*): The classes or kinds of predicates

viewed relatively to their subjects, to one or other of which classes every predicated thing may be referred; second intentions of predicates considered in relation to subjects.

Of these relations Aristotle (*Topica* 1. iv, v) recognized four, viz. *genus* (γενος), *definition* (οδος), *property* (ιδιος), *accident* (συμβεβηκος). Under *genus* he made the subdivision of *difference* (διαφορα). The list was subsequently modified by Porphyry and by the early Schoolmen, by the omission of *definition*, and addition of *species* (ιδος), giving the 'Five Predicables', *genus, species, difference, propriety, accident*

1551 *T. WILSON Logike* 3 b, I begin with the predicables, because they shew how much every word doth comprehend in itself. *Ibid.* They be called predicables because some one thing is spoken of an other. 1656 *BLOUNT Glossogr.* 1 v, In Logic there are five Predicables, otherwise called Porphyries five terms 1766 *GOLDSM. Vic. W.* vii, The essence of spirituality may be referred to the second predicabile. 1864 *BOWEN Logic* v. 112 In his analysis of judgments, Aristotle was led to consider how many kinds of Predicates there are, when viewed relatively to their Subjects, in other words, to determine the Second Intentions of Predicates considered in relation to Subjects. Thus was formed his celebrated doctrine of the Predicables which was considerably modified, but not improved, by his followers, Porphyry and the Schoolmen. 1906 *JOSEPH Introd. Logic* iv. 52 The Porphyrian list of predicables substitutes *Species* for *Definition*. But that difference implies a change in the point of view. *Ibid.* 96 It would be well to abandon the Porphyrian list of predicables in favour of the Aristotelian.

c. In the philosophy of Kant: see *quot.*

1902 *Baldwin's Dict. Philos.* II. 325/2 Kant undertook to set up his own 'predicables of the pure understanding', which were to be derivative conceptions under the categories.

Hence **Predicableness** (1727 in Bailey, vol. II), **Predicably adv.**

1727-41 *CHAMBERS Cycl.*, *Predicably, predicabiliter*, is used in the schools in opposition to *predicamentally*—Thus, matter is said to be united to form *predicably*, or *per accidens*, to exclude the notion of a predicamentally accident.

Predicament (prɪdɪˈkəmənt). Also 7 *præ-* [ad. late L. *prædicamentum* (Augustine) something predicated, a predicament, a quality (transl. Gr. *κατηγορία* of Aristotle), f. *predicare*: see **PREDICATE** *v.* and -MENT. So F. *prédicament* (13th c. in Hatz.-Darm.)]

Trans.* XCI. 99 Bringing *q. v.* - *z* under the predicament of quantity. 1864 *BOWEN Logic* v. 116 Having determined the Second Intentions of Predicates, which are the Predicables, Aristotle attempted to carry the analysis of judgments one step farther by determining their First Intentions, and was thus led to form his celebrated list of the ten Categories or Predicaments, [in which] he inquired how many and what particular things may be predicated of any Subject.
